SUMMARY

Lead Frontend Developer focused on React, TypeScript, and frontend architecture. 6 years of experience building multi-app products, design systems, and high-quality user interfaces.

FOCUS

TypeScript · React · Frontend Architecture · Design Systems · Performance

EXPERIENCE

Lead Frontend Developer

2023 – Jan 2026

BANGK — Remote

- Led frontend architecture for a TypeScript monorepo powering 4 products across web, mobile, internal tools, and marketing.
 - Built a shared design system and typed API patterns used across multiple applications.
 - Integrated EVM and Solana flows in a fast-moving Web3/ICO environment.
 - Led 6 developers through code reviews, mentoring, and technical standards while partnering with product and design.
-

Founder / Full-Stack Developer

Jan 2026 – Present

Drill — [getdrill.app](#)

- Built a performance-first learning product with TanStack Start, React, TypeScript, Hono RPC, Drizzle, and Tailwind CSS.
 - Owned product strategy, learning method, design system, and end-to-end type-safe architecture from database to UI.
 - Developed a public MCP server and used Claude Code/Codex daily for architecture, refactoring, and technical validation.
-

Earlier: Freelance frontend work for food-tech and SaaS products, including legacy modernization, React/TypeScript migration, and design system implementation.

EDUCATION

Frontend Software Developer — OpenClassrooms, 2020
